The retirement of Prince Louis of Battenberg from the British admiralty will be learned with no surprise, for the British admiral, who held the post of first sea lord, has been the subject of a newspaper campaign because of his Austrian birth and his German connections. In his letter of resignation, Prince Louis says he has been driven to the painful conclusion that his birth and parentage has had the effect of impairing his usefulness on the board of the admiralty and that he withdrew, hoping thereby to facilitate the task of the admiraltration, to which he had devoted his life.
